Journal of Radioanalytical and Nuclear Chemistry, Articles, Vol. 151, No. 2 (1991) 417–421

Index to Volume 151

No. 1

Preface 5

Software

Tian Weizhi (Beijing, P. R. China)
Activation analysis activities in China 7

Xizhang Feng (Beijing, P. R. China)
A new improved expression for gamma-ray detection efficiency of Ge(Li) detectors 41

G. Kennedy, S. Hobeika (Montreal, Quebec, Canada)
Pseudocyclic activation analysis of geological material 47

Y. S. Khrbish, N. M. Spyrou (Tripoli, Libya and Guildford, Surrey, England)
Prompt gamma-ray neutron activation analysis by the absolute method 55

C. Olivier, H. J. Morland (Stellenbosch, Republic of South Africa)
The elimination of matrix effects in the determination of fluorine by proton induced prompt gamma-spectrometry 63

Wei Lun-Cun, Bao Shanglian, Yang Qixiang, Yang Xihong (Beijing, P. R. China)
Lattice locations determination of trace amount carbon in gallium arsenide by theoretical calculation of CPAA with channeling 75

Hardware

Liu Yuren, Lu Yanxin, Xie Yali, Wang Yonghai, Du Youling, Tan Jin, Meng Bonian, R. S. Seymour (P. R. China and Oak Ridge, TN, USA)
Development and applications of an on-line thermal neutron prompt-gamma element analysis system 83

N. N. Papadopoulos, N. Tsagas (Athens and Xanthi, Greece)
Recent developments in short-lived nuclide activation analysis and analytical efficiency 95

Elsevier Sequoia S. A., Lausanne
Akadémiai Kiadó, Budapest

INDEX TO VOLUME 151

Chemical Separation

Chen Yinliang, Wang Xiaolin (Chengdu, P. R. China)
Neutron activation analysis of rhenium in rocks 103

Jin Li-Yun, Li Yun, Yang Ming (Beijing, P. R. China)
RNAA of trace iridium in Precambrian – Cambrian boundary samples by thiourea type chelate resin separation 107

Lu Zhaoda, Li Yinming, Din Yuzheng, Qian Ruisheng, Chen Da, Zhang Zebo (Xian, P. R. China)
Systematic separation and determination of some neutron-activated nuclides and actinides in fallout samples 113

Masamichi Tsukada, Daijiro Yamamoto, Kazutoyo Endo, Hiromichi Nakahara (Kawasaki and Tokyo, Japan)
Preconcentration method using an activatable yield tracer for neutron activation analysis 121

S. J. Yeh, C. L. Tseng, J. C. Wei (Taiwan, China)
Preconcentration on hydrous magnesium oxide for neutron activation analysis 131

Quality Control

K. Heydorn (Roskilde, Denmark)
Ouality control in activation analysis 139

A. Moauro, P. L. Carconi (Roma, Italy)
European intercomparison of vegetal standard reference materials, based on INAA and some non nuclear spectrochemical techniques 149

Bang-Fa Ni, Wei-Zhi Tian (Beijing, P. R. China)
NAA of IAEA lake sediment RM SL-3 for 45 elements 159

R. R. Rao, L. S. McDowell, C. K. Jayawickreme, A. Chatt (Halifax, Nova Scotia, Canada)
Evaluation of homogeneity of selected reference materials for selenium by cyclic neutron activation analysis 167

Applications: Geo- and Cosmosciences

Chai Chifang, Ding Zhuguo, Fu Jiamo, Sheng Guoying (Beijing and Guiyang, P. R. China)
Determination of trace elements in crude oils and organic materials extracted from oil-forming source rocks in China by INAA 177

J. Holzbecher, D. E. Ryan (Halifax, N. S., Canada)
Determination of some noble metals in iron meteorites by instrumental neutron activation analysis with a SLOWPOKE reactor 185

R. M. Knaus (Baton Rouge, LA, USA)
Instrumental neutron activation analysis to measure short-term accretion and erosion in wetlands using rare earth element soil horizon markers 191

Kong Ping, Chai Chifang, Mao Xueying, Ma Shulan (Beijing, P. R. China)
Chemical species of iridium and other trace elements in the Cretaceous-Tertiary boundary clays and their implication 201

L. G. Lackay, D. Gihwala, M. Peisach (Bellville and Faure, South Africa)
Measurement of proton-induced prompt low energy photons by high resolution spectrometry: The analysis of noble metals 213

M. Peisach, C. A. Pineda, L. Jacobson (Faure and Kimberley, South Africa)
Nuclear analytical study of rock paintings 221

M. Peisach, C. A. Pineda, L. Jacobson, J. H. N. Loubser (Faure, Kimberley and Bloemfontein, South Africa)
Analytical study of pottery from Soutpansberg 229

Tong Chunhan, Li Guodong (Chengdu, P. R. China)
A new method for identifying the types of organic matter 239

Applications: Life Sciences

G. D. Kanias (Athens, Greece)
Nutrient and other trace elements in instant soups 245

Bang-Fa Ni, Pingsheng Wang, Yingjun Luo, Shouyang Yu (Beijing and Harbin, P. R. China)
Determination of activable isotopic tracers of zinc by neutron activation analyis for study of bioavailability of zinc 255

E. A. Preoteasa, M. Salagean, A. Pantelica, D. Plostinaru, B. Constantinescu, St. Berceau (Bucharest, Romania)
INAA and PIXE study on the complex modifications of human blood serum mineral composition in several hemopathies 261

M. Saiki, M. B. A. Vasconcellos, J. R. Rogero, M. C. G. Cruz (São Paulo, Brazil)
Analysis of Brazilian snake venoms by neutron activation analysis 271

Sun Laiyan, Lu Fengying, Su Rongwei, Zhen Houxi (Beijing, P. R. China)
Determination and evaluation of some trace elements in Chinese foodstuffs 277

Tian Jibing, Qian Qingfang, Chai Chifang, Wang Ke, Qu Tong (Beijing, P. R. China)
The distribution of selenium and other elements in corn samples studied by NAA and a biochemical technique 287

Haiying Wang, Ch. M. Waana (Toronto, Ontario, Canada)
IVNAA investigation of factors affecting the background in the measurement of nitrogen 293

INDEX TO VOLUME 151

Wang Yinsong, Zhuang Guisun, Tan Mingguang, Zhi Min, Cheng Yuandi (Shanghai, P. R. China)
Distribution of some elements in human hair and internal organs, determined by neutron activation analysis 301

Zhang Weicheng, Zhang Tianmei, Lei Xiangguo (Gansu, P. R. China)
Determination of ^{13}C in breath sample by PIGE 313

Xiaofeng Zhang, Jianguo Ma, Junfa Qin, Lun Xiao (Beijing and Shanghai, P. R. China)
Multivariate statistical treatment of PIXE analysis of some traditional Chinese medicines 319

Zhuang Guisun, Wang Yinson, Tan Mingguang, Zhi Min, Wang Yongjie, Zhang Fulin (Shanghai, P. R. China)
Preliminary study of trace elements in human brain tumor tissues by instrumental neutron activation analysis 327

Applications: Environmental Science

G. Kennedy, S. Bergeron (Montreal, Quebec, Canada)
Tree rings as monitors of heavy metal air pollution histories 337

Wu Yuguang, Zhao Junlin (Beijing, P. R. China)
Determination of rare earths and other trace elements in samples of Antarctica by neutron activation analysis 345

Applications: Materials Science

P. L. Carconi, S. Casadio, A. Moauro (Rome, Italy)
Neutron irradiation of candidate ceramic breeder materials of fusion reactors; gamma-spectrometry of the activation nuclides and evaluation of the tritium produced by (n, α) reaction on ^{6}Li 357

O. K. Nikolaenko, I. V. Mirotin, M. M. Zaletina (Moscow and Novosibirsk, USSR)
Neutron activation determination of the oxygen factor for high temperature superconducting materials 365

K. S. Park, N. B. Kim, H. J. Woo, D. K. Kim, J. K. Kim, H. W. Choi (Daejeon, Korea)
Determination of impurities in semiconductor grade silicon by instrumental neutron activation analysis 373

A. E. Pillay, M. Peisach (Faure, South Africa)
Application of prompt gamma-ray spectrometry to helium-3-induced activation of boron 379

C. A. Pineda, M. Peisach (Faure, South Africa)
Prompt analysis of rare earths by high-energy PIXE 387

G. I. Shmanenkova, V. P. Shchelkova, T. P. Uritskya, L. V. Volkova (Moscow, USSR)
Determination of rare earth elements in mineral raw materials and rare earth industry products by neutron activation analysis 397

Ye Zongyuan, Li Yubing, Ding Shengyao, Bao Zongyu, Yang Xiaoyun, Rong Chaofan (Beijing, P. R. China)
A method for detecting explosives 409
